BASIC-ABSTRACT:

The holder/protector for flowers comprises a container having a body tapering in a conical form from an open top to a closed base. The container body is formed from a folded paperboard blank having interlocks for holding the blank in the assembled condition. The blank is capable of being stored in a flat

Best Available Copy

state.

The base of the container body is truncated so that the container body may stand in an upright position supported by its base.

USE - For carrying or display.
